Art Unit: 1774

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6 and 17-20, drawn to compositions and processes of making the same, classified in class 428, subclass 402.21.
- II. Claims 7-18, drawn to recording material, classified in class 503, subclass 215.

The inventions are distinct, each from the other, because the compositions of Group I have use other than in the recording material of Group II (e.g., use in a scratch-and-sniff perfume sheet). It is noted that the composition loses its identity in the article (i.e., it is dried in the article).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
